

## TECHNICAL BULLETIN

### Vapor Recovery Nozzle Warranty Determination

Husky Corporation has traditionally used nozzle serial numbers to determine the warranty period on both balanced and vac-assist vapor recovery nozzles. Beginning March 2008 Husky vapor nozzles will no longer be produced with serial number plates on the bottom of the hand guards. A nozzle's warranty period will be determined based on a calculation using the "remove after date" laser marked on the aluminum data disc affixed to the nozzle body. This disc is found on the left side of the nozzle body under the hand warmer.

#### Vapor Recovery Nozzles:

The remove after date is a five year post date from the date of manufacture. To determine if a vapor nozzle is still within its 15 month warranty period subtract 4 years from the remove after date and add 3 months. Example: To determine if a nozzle with a “remove after date” of 01/2013 is still in warranty subtract four years from 01/2013 and you arrive at 01/2009. Add 3 months to 01/2009 and you arrive at 04/2009 which is the final month of warranty for the nozzle. The chart below shows warranty expiration dates for nozzles with “remove after dates” of January thru December of 2013.

<b>Remove after date on vapor nozzle</b>	<b>Warranty expiration date for vapor nozzle</b>
01/2013	04/2009
02/2013	05/2009
03/2013	06/2009
04/2013	07/2009
05/2013	08/2009
06/2013	09/2009
07/2013	10/2009
08/2013	11/2009
09/2013	12/2009
10/2013	01/2010
11/2013	02/2010
12/2013	03/2010

Using the “remove after date” to determine warranty eligibility will simplify the verification process for warehouse personnel who are charged with return goods activities. There is no need to access the Husky website to look up serial numbers. Warranty determinations can be made simply by reviewing the nozzles data tag and following the method above to determine if a nozzle is or is not in warranty. Please note that a unique seven digit serial number is provided on the data disc for individual nozzle identification as well as a six digit lot number to identify which production lot the nozzle was produced in.

For further information or questions about this change of warranty determination please contact Joe Laschke Husky Technical Service Representative at [jlascchke@husky.com](mailto:jlascchke@husky.com) or our customer service department at 800-325-3558
