CONVENTIONAL FUELING

**Pressure activated, automatic shut-off nozzle for full-service and self-service stations.**

- XS® nozzle shuts off when:
  - the pump shuts off.
  - the gas tank is full.
  - the lever is opened before the pump is turned on.
  - the leak detector has not completed the test cycle.
- *StreamShaper®* reduces turbulence for straighter fuel flow and less splash back spillage.
- Comes standard with smooth full grip guard.
- A reinforced stainless steel spout bushing keeps spout tip round and acts as a captive fastener to prevent tip-end sensor damage.
- Nozzle is equipped with a unique Flo-Stop® device that shuts off the nozzle if it falls from the fill tank or raises above the horizontal.
