

# VIIIS Nozzles

4-8

HIGH VOLUME FUELING

**Pressure activated, automatic shut-off nozzle with polymer handguard for truck stop and other high volume full-service, self-service and unattended stations.**

- VIIIS nozzle shuts off when:
  - the pump shuts off.
  - the gas tank is full.
  - the lever is opened before the pump is turned on.
  - the leak detector has not completed the test cycle.
- Nozzle is equipped with a unique Flo-Stop® device that shuts off the nozzle if it falls from the fill tank or raises above the horizontal.
- Spout is reinforced with thick aluminum bushing that retains spout spring and keeps spout from rounding-in; the two leading causes of clicking off and splash-back spillage.
