

Pressure-activated, automatic shut-off nozzle for full-service and self-service stations.

- 1AS nozzle shuts off when:
 - the pump shuts off.
 - the gas tank is full.
 - the lever is opened before the pump is turned on.
 - the leak detector has not completed the test cycle.
- Optional tilt poppet design provides precise “to-the-penny” dispensing.
- Optional cold weather seals are rated to -40° F/C.
- Optional Gilbarco, Tokheim, and Wayne handguards can be fitted with a magnet to trigger the dispenser’s proximity switch, or can be provided without the magnet for dispensers equipped with a standard “flapper” switch.
- Stainless steel reinforced spout bushing keeps spout tip round, and acts as a captive fastener to prevent tip-end sensor damage.
- Nozzle is equipped with a unique Flo-Stop® device that shuts off the nozzle if it falls from the fill neck or raises above the horizontal.
- *StreamShaper®* reduces turbulence for straighter fuel flow and less splash back spillage.
- Comes standard with smooth full grip guard.
